SIEGE OF JERUSALEM

Game of the Epic Siege of 70 AD

The relatively low response to the canvassing of reader opinion on SIEGE OF JERUSALEM can be attributed, I think to one of two situations. First, it may be simply due to the short time between the past two issues, forcing me to calculate these values before a proper sampling could be obtained. Or it may be that few among the readership have yet to try their hand at this "monster" game, put off by subject or size, and felt reticent in putting in their "twocent's worth". Regardless, with but 41 entries, the game did not garner enough for a fair judgement to be rendered, and so these values will not appear on the ongoing RBG. We'll try again at some point in the future.

The collective viewpoint of those who responded did point up some interesting facts, however. Most surprising might be the reader-rating for "Complexity"; they adjudged the game simpler than we had thought. Familiarity with its previous incarnation may have had a hand in this; or perhaps we are simply looking at the scope of the game, and not the mechanics. The rating for "Balance" is one of the poorest to date, reflecting the notion (mistaken, I think) that taking on the role of a besieged force has little to offer the competitive wargamer. The "Mapboard" rating no doubt was

affected by the fact that this is one of the few unmounted Avalon Hill maps. And, of course, the length of play indicates that one must be willing to invest a significant block of time to get the full flavor of the system, and is no doubt a factor in the low response to the survey.

READERS BUYER'S GUIDE

The following games are ranked by their reader-generated overall Value rating. Further aspects of reader response to our titles are indicated by the ratings in other categories. By breaking down a game's ratings into these individual categories, the gamer is able to discern for himself where the title's strengths and weaknesses lie in the qualities he values highly. Readers are reminded that ratings take the form of a numerical value ranging from 1 to 9 (with "1" equalling "excellent" and "9" equalling "terrible"). However, the Game Length category is measured in multiples of ten minutes (thus, a rating of "18" equates to three hours). A "+" following the Year of release indicates that the game is continued or complemented by additional modules in successive years (for instance, the ratings for SL reflect the entire system-original game plus add-on modules). Game Type is broken down into three broad categories: SO = Solitaire; MP=Multi-Player; 2P=Two Player. Finally, it should be noted that a minimum requirement of 50 responses (see the "Sample Base") was judged necessary for a valid representation; additional titles that garner such will be added to the RBG in the future.
