

## Replacement/variant counters for US Navy Plan Black & The Great War at Sea I & II

---

The bulk of the variant counters contained in this file are intended as replacements for the 1/2-inch counters provided in *US Navy Plan Black*. The remainder are for use with *The Great War at Sea I & II*, and the *GWaS* system at large. The Russian and Italian units are updates of earlier variant counters with more accurate deck plans. Also included are a number of German and British armed merchant cruisers that can be used in place of the more generic counters included in Avalanche Press Ltd.'s *US Navy Plan Black*. These are all examples of liners that either were actually armed as auxiliary cruisers, or which would likely have been armed, had circumstances been slightly different.

To assemble, first mount front side of the counter sheet to a sheet of mat or chip board using a permanent spray adhesive. With a very sharp X-acto knife and a metal straight edge, trim the mounted counter sheet along any two adjoining edges using the □ marks at each corner as guides. Do the same for the corresponding two edges of the as yet unmounted back side (remember that the back side sheet is a mirror image of the front). Next mount the back sheet to the cardboard, aligning the freshly trimmed edges of the paper and cardboard together. The counter images on the front and back sides should now match up nicely. Last, trim the counters from the cardboard, two rows at a time. Leave the "dividing" areas between the double counter rows intact if possible, to prevent the counters from shifting while they are cut.
